Acknowledgements

Conducting a large-scale community health assessment (CHA) of this size is impossible without a collaborative approach from a variety of stakeholders across the community. The Bell County Health Department (BCHD) would like to express its gratitude for the contributions made by those who participated in the development of this assessment. Special thanks to the agencies listed in **Appendix A** that contributed to the successful assessments and completion of this report that were critical to the success, breadth, and diversity of data collection. Partners were instrumental in survey distribution and community forum recruitment through their networking circles.

Introduction

A journey toward community health improvement (CHI) involves a CHA and improvement planning process. A CHA paints a comprehensive picture of a community's current health status, factors contributing to higher health risks or poorer health outcomes, and community resources available to improve health.¹ The following **2023 Bell County Community Health Assessment** includes data and information from multiple sources (see **References**), which describe the district's demographics; health status; morbidity and mortality; socioeconomic characteristics; quality of life; community resources; behavioral factors; the environment (including the built environment); and other social and structural determinants of health status. This document includes a general overview of the county, then takes a deeper dive into Bell County's health status. BCHD sponsored the CHI process, which was facilitated in collaboration with Eastern Kentucky University's Department of Public Health and Clinical Sciences (EKU IRB Research Protocol #5521). Developing the CHA in partnership with other organizations and community members provided opportunities to foster a shared understanding among the public health system of the community's health needs. The CHA provides valuable insight to inform the basis of county-led community health improvement plan strategies. Mobilizing Action through Planning and Partnerships (MAPP) provides a structure for communities to assess their most pressing population health issues and align resources across sectors for strategic action.² See **Appendix B** for how a modified version of MAPP 2.0 was utilized for this CHI process.

Bell County Partnership Vision

A partnership vision statement establishes a focus, direction, and purpose for the partnership's work. Partners consider an aspirational definition of how the partnership will impact the community, usually five to 10 years in the future. During the September 19, 2023 virtual CHI kick-off meeting, CHA participants reflected on the following question, "What does a healthy and safe Bell County look like to you? Consider important characteristics for all who live, work, and play here." and provided words/comments via an online collaborative board tool. These words/comments were synthesized into a draft vision statement that was presented, edited, and approved during the community health improvement forum on October 25, 2023. The final Bell County Partnership Vision statement reads:

A healthy and safe Bell County is a community with accessible substance abuse treatment and harm reduction, including syringe exchange. We prioritize mental health, combat loneliness among the elderly, reduce homelessness, and offer resources for smoking cessation and nutritional education. Physical activity options promote well-being, creating a united and thriving environment for all.

Comprehensive Data Collection

Development of this CHA integrated primary, secondary, quantitative, and qualitative data from a variety of data sources collected during the CHI process. A description of each data collection method used is provided below.

County Health Rankings Measures³

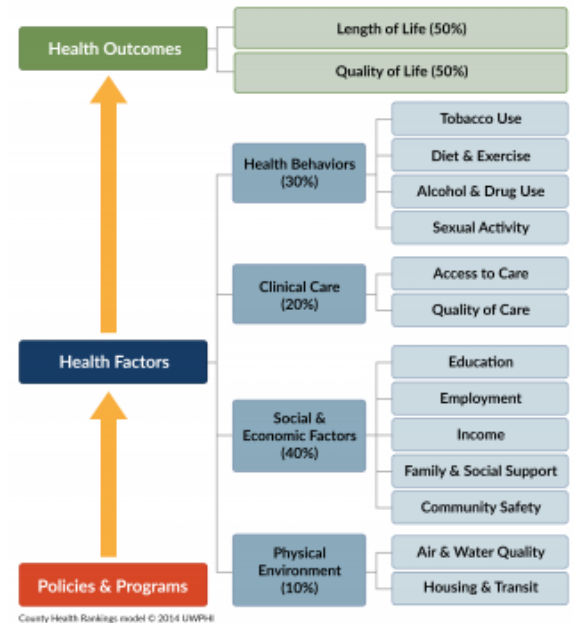

Secondary data comparing Bell County to Kentucky and the United States for health outcomes and health factors measures from the County Health Rankings Model was utilized. The County Health Rankings Model demonstrates how different elements affect health outcomes. County Health Rankings measures the health of nearly all counties in the nation and ranks them within states. The Rankings are compiled using county-level measures from a variety of national and state data sources. Health Outcomes shows how long people live on average within a community, and how much physical and mental health people experience in a community while they are alive. Health Factors represent those things that can be improved to live longer and healthier lives. They are measures of the future health of our communities.

Health Outcomes include two sub-areas:

1. Length of Life
2. Quality of Life

Health Factors include four sub-areas:

1. Health Behaviors
2. Clinical Care
3. Social and Economic Factors
4. Physical Environment

Community Health Status Assessment

A 38-question community health status assessment survey instrument was available to the Bell County Community to complete from September 19, 2023, to October 30, 2023. This survey was promoted via partner listservs, social media, and websites. A total of 281 surveys were completed. This method collected primary quantitative and qualitative data. Results from this assessment are integrated throughout this CHA. See **Appendix C** for the survey instrument and results.

Community Health Improvement Forum

On November 8, 2023 a ½ day community health improvement forum was hosted at Pine Mountain State Resort Park. Community partners and members were invited to attend this forum to reflect on the community's health status by reviewing county-specific health data from the County Health Rankings Measures and findings from the Community Health Status Assessment survey results. Modified versions of MAPP 2.0 Community Partner and Community Context Assessments, which included discussions on health equity and social determinants of health, were incorporated into the community forum conversations. Bell County members identified its priority health issues for the county by conducting a consensus voting technique during the forum. Bell County will address these issues in a county-led community health improvement plan. Qualitative responses captured via notes and Google Jamboard during these community forum conversations are incorporated throughout the community health profile starting on Page 5 of this document.

Bell County: Community Health Profile

Demographics

Bell County is Micropolitan (intersecting an urban core of at least 10,000 but less than 50,000 population)). In Bell County, 62.5% of the population lives in a low population density area (500 or fewer people per square mile and less than 2,500 people). On July 1, 2022, Bell County had an estimated population of 23,568 people with a median age of 41.4. Females represented 50% of the population, and persons under 18 years accounted for 21.4% of the population, with persons over 65 representing 19.8%. The

four most prominent ethnic groups are White (Non-Hispanic) (94.1%), Black or African American (Non-Hispanic) (2.8%), Two or More Races (Non-Hispanic) (2.2%), and Asian (Non-Hispanic) (0.5%). Hispanic or Latino people make up 1.4% of the population. In 2020, the Bell County diversity index was 14.1% (percentages closer to 100% represent a more diverse community). Languages other than English spoken at home averaged 0.3% between 2017-2021.⁴

Residents who are U.S. citizens make up 99.8% of the population. As of 2020, 0.2% of Bell County residents (47 people) were born outside of the United States, which is lower than the national average of 13.6%. The average number of veterans residing in Bell County between 2017-2021 was 917 or 3.9% of the population. Persons with a disability under the age of 65 averaged 20.4% of the total Bell County population between 2017-2021.⁴

Demographic Tables: Comparisons among Bell County to KY and the US

| | Total Population (July 1, 2022 Estimate) | | |

Health Outcomes

Health outcomes represent how healthy a county is right now, in terms of length of life but quality of life as well. The 2023 County Health Rankings framework ranked Bell County as the 112th healthiest county in Kentucky; ranking it among the least healthiest counties in Kentucky (lowest 0%-25%).³

Life Expectancy: From 2018-2020, the average life expectancy in Bell County was 70.6 years, which is lower compared to Kentucky and the United States.⁵ Data disaggregated by subpopulation, including race and ethnicity, is not available for this measure.

Life Expectancy
average number of years a person can expect to live, 2018-2020

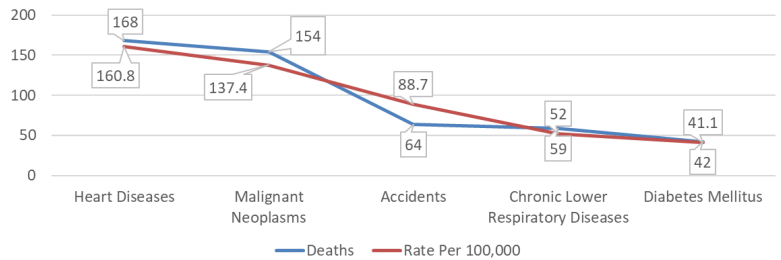

Premature Death:

Premature death looks at years of potential life lost. In 2019, 15,200 years of life were lost to deaths of people under age 75, per 100,000 people. Data trending for this measure over time is getting worse.⁵ Data disaggregated by subpopulation, including race and ethnicity, is not available for this measure.

ethnicity, is not available for this measure.

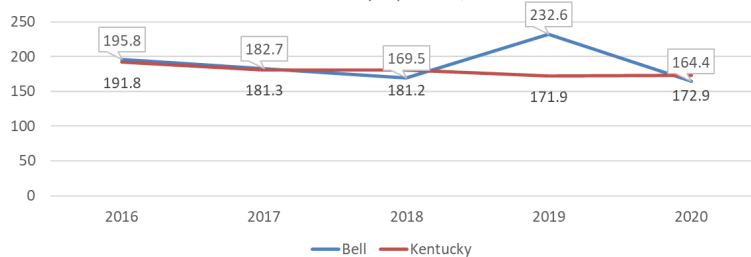

Leading Causes of Death: For 2018-2020, the top five leading causes of death for persons under age 75 in Bell County were (1) diseases of heart, (2) malignant neoplasms (cancer), (3) accidents (unintentional injuries), (4) chronic lower respiratory diseases, and (5) diabetes mellitus.⁵ Data disaggregated by subpopulation, including race and ethnicity, is unreliable for this measure.

Leading Causes of Deaths Under Age 75
Bell County, 2018-2020

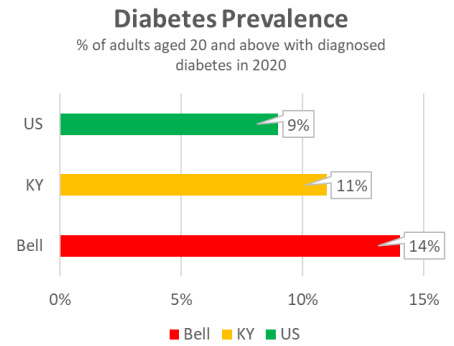

Cancer Mortality Rates (Malignant Neoplasms): Cancer mortality rates represent the number of cancer deaths per 100,000 population during a specific time period. In 2020, the cancer mortality rate for all cancer sites in Bell County was 164.4 per 100,000, this decreased from the 2019 rate of 232.6 per 100,000.⁶ Data disaggregated by subpopulation, including race and ethnicity, is unreliable for this measure.

Cancer Mortality Rates All Sites
Bell County – per 100,000

Diabetes Prevalence: The Kentucky Behavioral Risk Factor Surveillance System (KyBRFS) reports that in 2020, 14% of adults aged 20 or older in Bell County were living with a diagnosis of diabetes.⁷ A 2021 KyBRFS Area Development District (ADD) report indicated 17% of persons living in Cumberland Valley ADD have diabetes.⁸ Data disaggregated by subpopulation, including race and ethnicity, is not available for this measure.

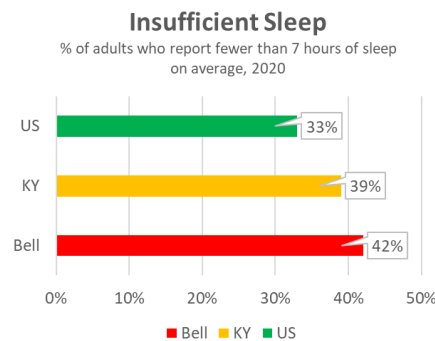

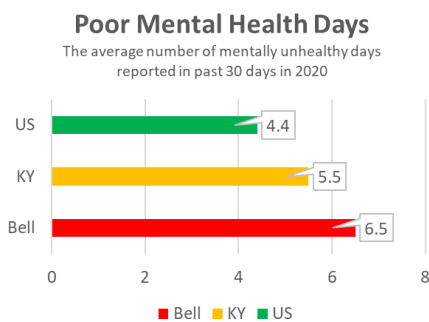

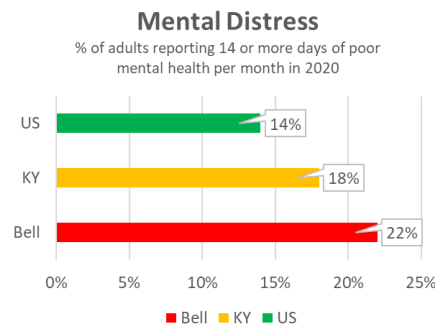

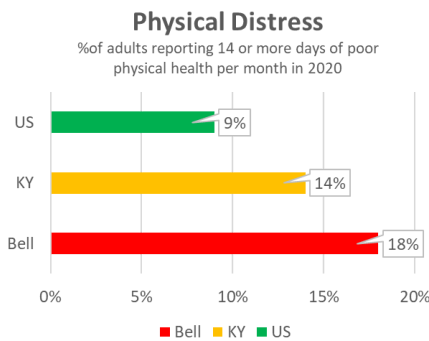

| Bell County Drug Overdose Deaths | |
|----------------------------------|------------------|
| Year | Number of Deaths |
| 2022 | 10 |
| 2021 | 15 |
| 2020 | 9 |
| 2019 | 9 |
| 2018 | 8 |

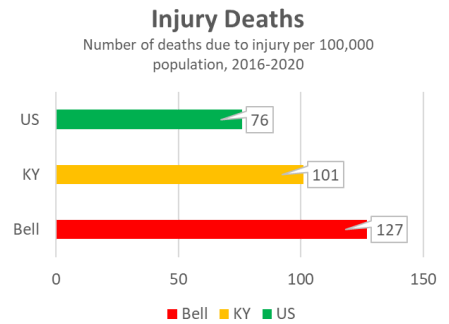

Drug Overdose Deaths: Drug overdose deaths are a leading contributor to premature death and are largely preventable. In 2022, there were 10 reported drug overdose deaths according to the 2022 Kentucky Overdose Fatality Report published by the Kentucky Office of Drug Control Policy. This is a decrease from 2021 when 15 deaths were reported. Data disaggregated by subpopulation, including race and ethnicity, is not available for this measure.⁹

Physical and Mental Health: In 2020, the KyBRFS results indicate that 28% of adults in Bell County reported that they consider themselves in fair or poor health, 18% reported experiencing poor physical health for 14 or more of the last 30 days, and adults reported that their physical health was not good on 5.6 of the previous 30 days.

Additionally, 22% reported experiencing poor mental distress for 14 or more of the last 30 days and their mental health was not good on 6.5 of the previous 30 days, compared to Kentucky at 5.5, and the US at 4.4.⁷ Sleep is an important part of a healthy lifestyle, and a lack of sleep can have serious negative effects on one's own health. In Bell County in 2020, 42% of adults reported getting fewer than 7 hours of sleep per night on average.⁷ Data disaggregated by subpopulation, including race and ethnicity, is not available for these measures.

Injury Deaths: Injuries happen when a place is unsafe or when people engage in unsafe behaviors and may be intentional or unintentional. Intentional injuries are usually related to violence caused by oneself or by another. Unintentional injuries are accidental in nature. Unintentional injury death rates are higher in rural places than urban. In Bell County there were an average of 127 deaths due to injury such as homicides, suicides, motor vehicle crashes and poisonings, per 100,000 people from 2016-2020.⁵ Data disaggregated by subpopulation, including race and ethnicity, is not available for this measure.

Child Mortality and Low Birthweight: The child mortality rate is the number of deaths among residents under age 18 per 100,000 population. This rate can have a large impact on years of potential life lost (YPLL). In Bell County there were an average of 80 deaths per 100,000 children under age 18 between 2017-2020.⁵ Low birthweight is the percentage of live births with low birthweight (< 2,500 grams). Infants born with low birthweight have approximately 20 times greater chance of dying than those with normal birth weight. Infants who survive may face adverse health outcomes such as decreased growth, lower IQ, impaired language development, and chronic conditions during adulthood. In Bell County from 2014-2020, on average, 10% of babies had low birth weights.⁵ Data disaggregated by subpopulation, including race and ethnicity, is not available for these measures.

BCHD Programs & Services Addressing Health Outcomes in Bell County

- *Breast and Cervical Cancer screenings* are available to income eligible women who have no third party payer.
- *Tobacco Prevention and Control Program* works to prevent the initiation of tobacco use among young people and promotes cessation among young people and adults to improve lung and bronchus/other cancers associated with tobacco use.
- *Maternal and Child Health Programs, Child Fatality Review, First Steps Program, Child Care Health Consultation, Womens, Infants, and Children (WIC), WellChild, Breastfeeding Counseling, and HANDS Program* prevent infant and child morbidity and mortality across the area.

Visit BCHD [website](#) for more information on these programs.

Health Factors

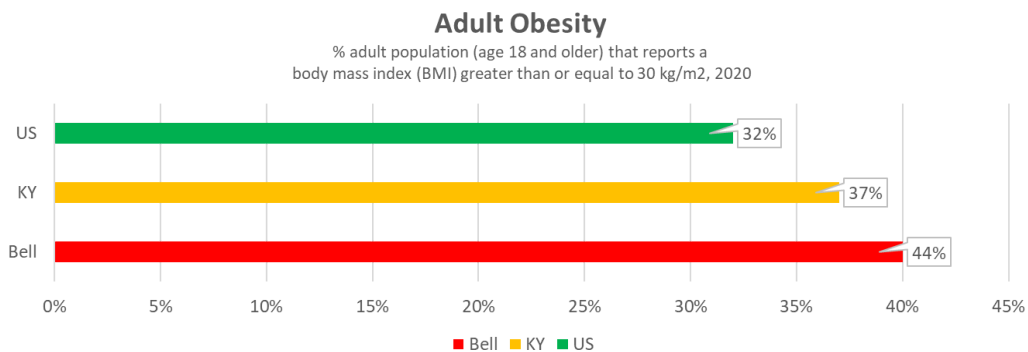

Health Factors can be modified to improve the length and quality of life for residents. Measures for four Health Factors are included in this CHA: *Health Behaviors*, including alcohol and drug use, diet and exercise, sexual activity and tobacco use; *Clinical Care*, including health care access and quality; *Social and Economic Factors*, including education, employment, income, family and social support and community safety, and; *Physical Environment*, including air and water quality, housing, and transit.³

Health Behaviors

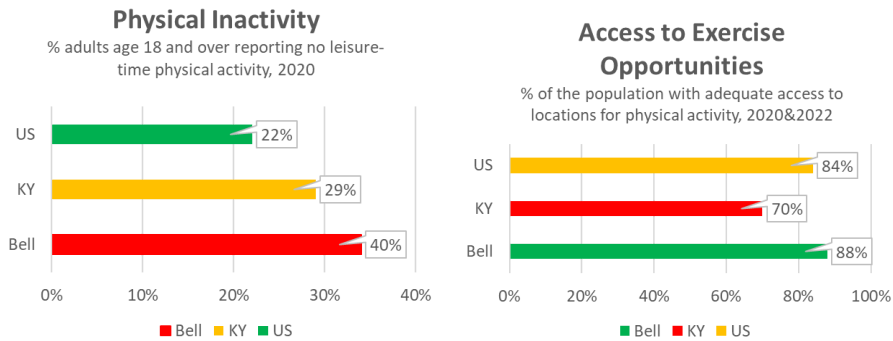

Adult Smoking: Adult Smoking is the percentage of the adult population in a county who both report that they currently smoke every day or some days and have smoked at least 100 cigarettes in their lifetime. Cigarette smoking is identified as a cause of various cancers (including lung and bronchus cancer⁶), cardiovascular disease, and respiratory conditions, as well as low birthweight and other adverse health outcomes. In 2020, 32% of the Bell County population were current smokers.⁷ Data disaggregated by subpopulation, including race and ethnicity, is not available for this measure.

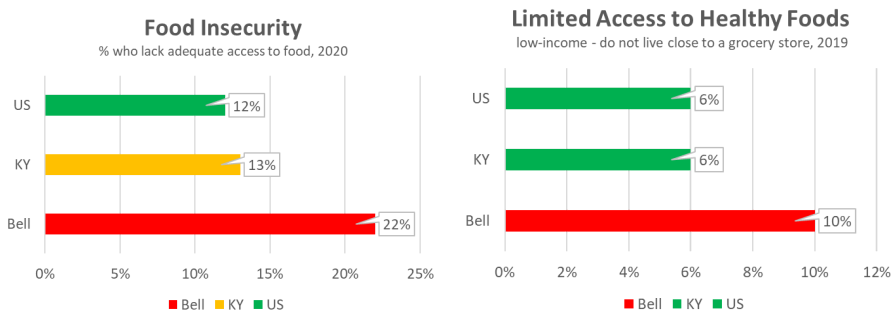

Adult Obesity: Adult obesity represents the percentage of the adult population (age 18 and older) that reports a body mass index (BMI) greater than or equal to 30 kg/m² (age-adjusted). Adult obesity is a chronic condition that puts individuals at increased risk of hypertension, heart disease, type 2 diabetes, breathing problems, chronic inflammation, mental illness, and some cancers. Obesity is a product of environmental and individual factors. Environmental factors such as accessibility and affordability of nutrient-dense foods and the prevalence of fast-food marketing. In Bell County in 2020, 44%, or 2 out of 5 individuals age 18 and older, reported they were obese.⁷ Data disaggregated by subpopulation, including race and ethnicity, is not available for this measure.

Physical Inactivity & Access to Exercise Opportunities: Physical inactivity is the percentage of adults age 18 and over reporting no leisure-time physical activity (age-adjusted). In Bell County in 2020, 40% of adults, or 2 out of 5 adults age 18 or over, reported participating in no physical activity outside of work.⁷ Access to exercise opportunities is the percentage of the population with adequate access to locations for physical activity. In Bell County in 2020, 88% of people lived close to a park or recreation facility.⁷ Data disaggregated by subpopulation, including race and ethnicity, is not available for these measures.

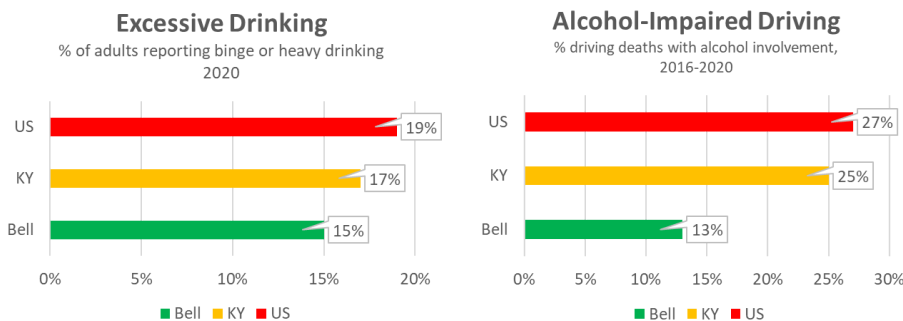

Food Insecurity & Limited Access to Healthy Foods: Food insecurity represents the percentage of the population who lack adequate access to food. In Bell County in 2020, 22% of people, or 1 out of 5, did not have a reliable source of food.¹⁰ Limited access to healthy foods is the percentage of the population who are low-income and do not live close to a grocery store. In Bell County in 2019, 10% of people had low incomes and did not live close to a grocery store, limiting their ability to access healthy foods.¹¹ Data disaggregated by subpopulation, including race and ethnicity, is not available for these measures.

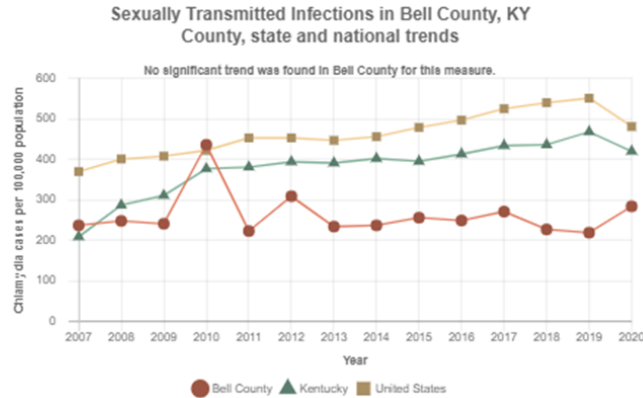

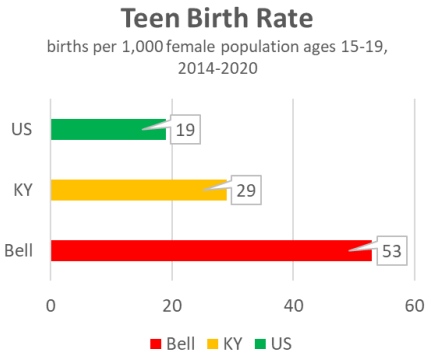

Excessive Drinking & Alcohol-impaired Deaths: Excessive drinking represents the percentage of adults reporting binge or heavy drinking (age-adjusted). In Bell County in 2020, 15% of adults reported binge or heavy drinking.⁷ Alcohol-impaired deaths is the percentage of driving deaths with alcohol involvement.

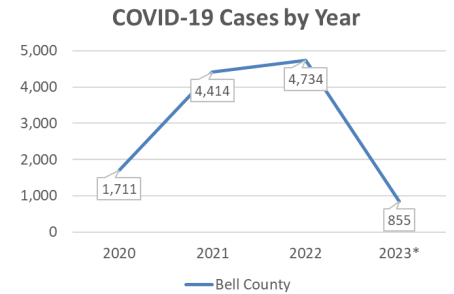

Alcohol-impaired deaths is the percentage of driving deaths with alcohol involvement. In Bell County, 13% of motor vehicle crash deaths involved alcohol on average from 2016-2020.¹² Data disaggregated by subpopulation, including race and ethnicity, is not available for these measures.

Sexually Transmitted Infections & Teen Births: Sexually transmitted infections is the number of newly diagnosed chlamydia cases per 100,000 population. In Bell County in 2020, 284.3 new cases of chlamydia were diagnosed per 100,000 people.¹³ There is no significant trend for this measure. Teen births represent the number of births per 1,000 female population ages 15-19. In Bell County, there were 53 teen births per 1,000 females ages 15-19 on average between 2014-2020.¹⁴ Data disaggregated by subpopulation, including race and ethnicity, is not available for these measures.

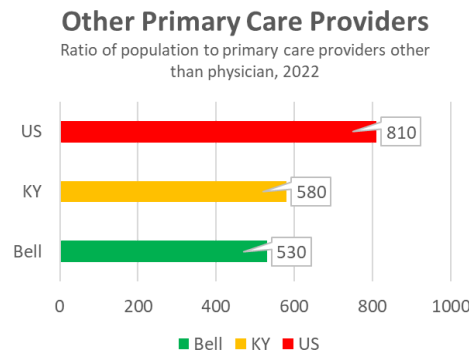

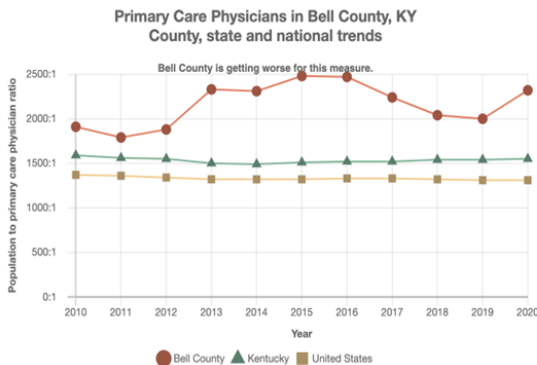

Infectious Diseases: Infectious diseases, also known as communicable diseases or transmissible diseases, are illnesses that result from the infection, presence and growth of pathogenic (capable of causing disease) biologic agents in an individual human or other animal host.¹⁵ The graph to the right shows trending COVID-19 cases since 2020 through *October 9, 2023. Data disaggregated by subpopulation, including race and ethnicity, is not available for this measure.

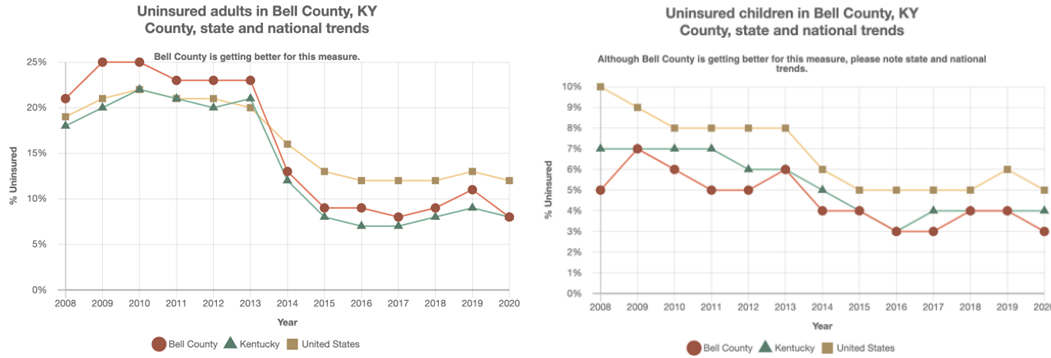

Clinical Care

Primary Care Physicians & Other Primary Care Providers: There was one primary care physician per 2,320 people in Bell County. Trending over time, Bell County is getting worse for this measure.¹⁶ There was one primary care provider other than a physician per 530 people registered in Bell County. This includes nurse practitioners (NPs), physician assistants (PAs), and clinical nurse specialists who can provide routine and preventative care. Data disaggregated by subpopulation, including race and ethnicity, is not available for these measures.

Uninsured: Percentage of population under age 65 without health insurance. In Bell County in 2020, 8% of people under the age of 65 did not have health insurance. Uninsured children is the percentage of children under age 19 without health insurance. In Bell County in 2020, 3% of children under age 19 did not have health insurance. For trending, Bell County is getting better for both measures.¹⁷ Data disaggregated by subpopulation, including race and ethnicity, is not available for these measures.

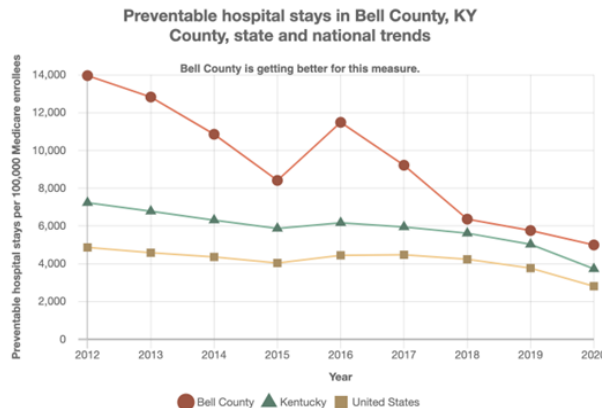

Mental Health Providers: Ratio of population to mental health providers. In 2022, there was one mental health provider per 2,930 people registered in Bell County.¹⁸ Data disaggregated by subpopulation, including race and ethnicity, is not available for this measure.

Mental Health Providers

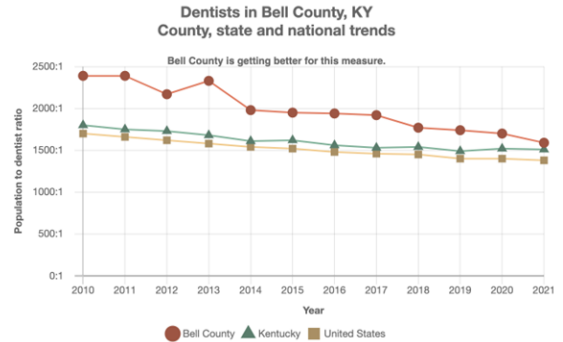

Ratio of population to mental health providers, 2022

Preventable Hospital Stays: Rate of hospital stays for ambulatory-care sensitive conditions per 100,000 Medicare enrollees. In Bell County in 2020, 4,995 hospital stays per 100,000 people enrolled in Medicare might have been prevented by outpatient treatment.¹⁹ Data disaggregated by subpopulation, including race and ethnicity, is not available for this measure.

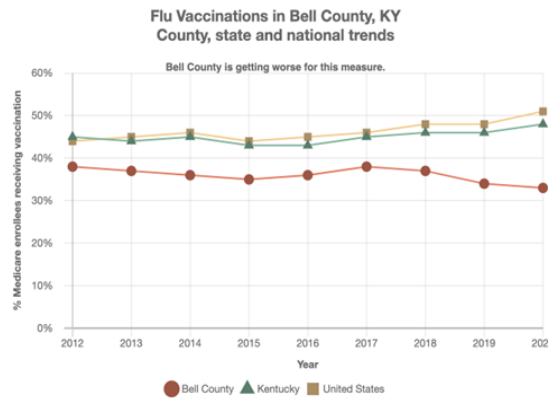

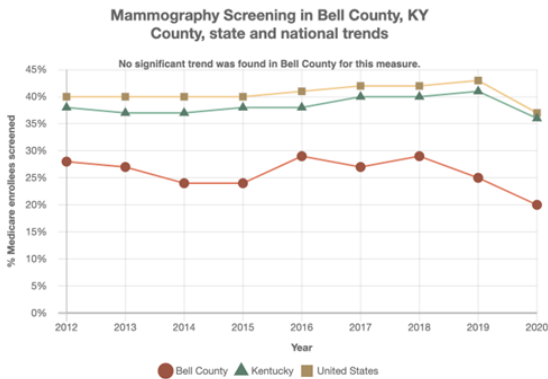

Dentists: Ratio of population to dentists. Untreated dental disease can lead to serious health effects including pain, infection, and tooth loss. In 2021, there was one dentist per 1,590 people registered in Bell County. Trending over time is getting better for this measure.¹⁶ Data disaggregated by subpopulation, including race and ethnicity, is not available for this measure.

Mammography Screening:

Percentage of female Medicare enrollees ages 65-74 that received an annual mammography screening. In Bell County in 2020, 20% of female Medicare enrollees received an annual mammography screening. There is no significant trend for this measure, however, Bell County rates are over 15% lower compared to that of Kentucky and the United States. Data disaggregated by race shows Whites have the highest rates at 20%, compared to Blacks at 18%.¹⁹

Flu Vaccinations: Percentage of fee-for-service (FFS) Medicare enrollees that had an annual flu vaccination.

In Bell County in 2020, 33% of Medicare enrollees received an annual flu vaccine. Trending for this measure is getting worse. Data disaggregated by race shows Whites have the highest rates at 33%, compared to Blacks at 27%.¹⁹

BCHD Programs & Services Addressing Health Behaviors and Clinical Care in Bell County

- *Breast and Cervical Cancer screenings* are available to income eligible women who have no third party payer.
- *Tobacco Prevention and Control Program* works to prevent the initiation of tobacco use among young people and promotes cessation among young people and adults.
- *Womens, Infants, and Children (WIC)* promotes nutritional education & healthy food vouchers for participants.
- *Wellness Programs* are offered for physical activity, osteoporosis, falls prevention, arthritis & safety.
- Clinical care and preventable services for *immunizations, sexually transmitted infections, tuberculosis, nutrition education, & family planning* are offered. Additionally, *reportable disease surveillance, monitoring, reporting, and education* are provided throughout the area.

Visit BCHD [website](#) for more information on these programs.

Social and Economic Factors

Social and economic factors look at social determinants of health. They represent the nonmedical factors that influence health outcomes and are the conditions in which people are born, grow, work, live, and age, and the wider set of forces and systems shaping the conditions of daily life. They include Education Access & Quality, Economic Stability, Social & Community Context, Neighborhood and Built Environment, and Health Care Access & Quality.²⁰

Social Determinants of Health

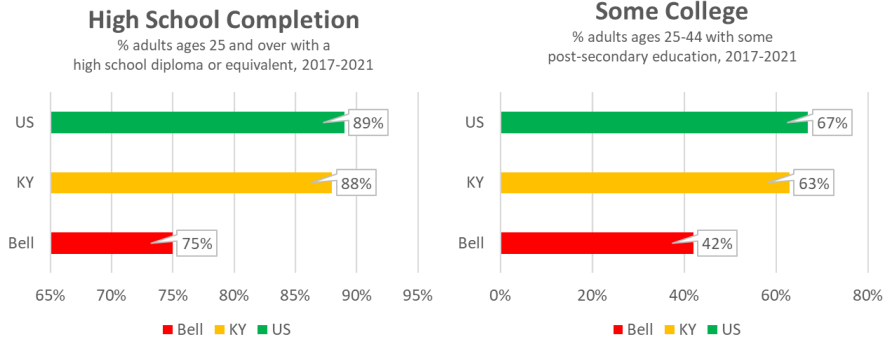

Education Access & Quality

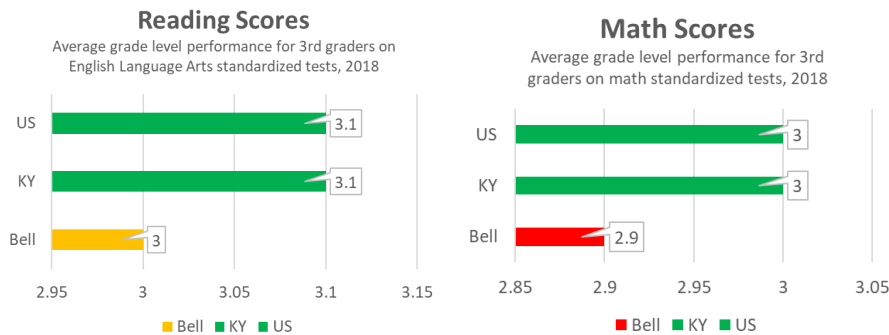

High School Completion & Some College: High school completion is the percentage of adults ages 25 and over with a high school diploma or equivalent. In Bell County, 75% of adults (age 25 or older) on average from 2017-2021 had a high school degree or equivalent, such as a GED.²¹ Some college is the

percentage of adults ages 25-44 with some post-secondary education. In Bell County, 42% of adults (age 25-44) on average from 2017-2021 had completed some post-secondary education, including vocational/technical schools, junior colleges, or four-year colleges. This includes

those who had and had not attained degrees.²² Data disaggregated by subpopulation, including race and ethnicity, is not available for these measures.

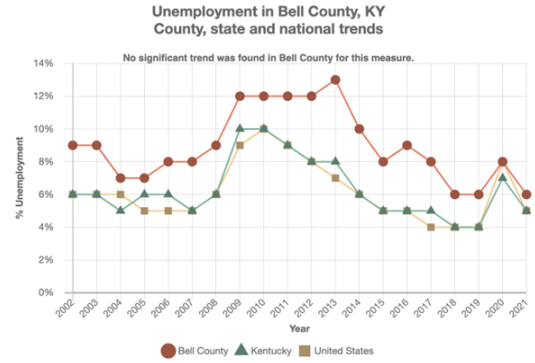

Reading and Math Scores: Reading scores is the average grade level performance for 3rd graders on English Language Arts (reading) and math standardized tests. In Bell County in 2018, third grade students scored, on average, 3 on a standardized test for English language arts and 2.9 for math. A score of 3.0 indicates students performed at grade-level.²² Data disaggregated by subpopulation, including race and ethnicity, is not available for these measures.

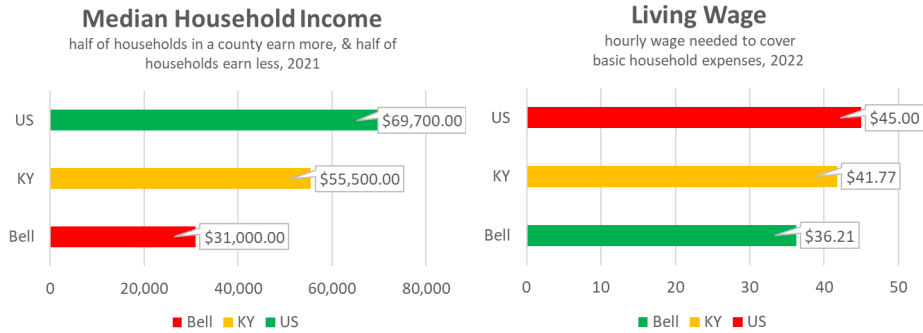

Economic Stability

Unemployment: Percentage of population ages 16 and older unemployed but seeking work. In Bell County in 2021, 5.7% of people age 16 and older were unemployed but seeking work.²³ Data disaggregated by subpopulation, including race and ethnicity, is not available for this measure.

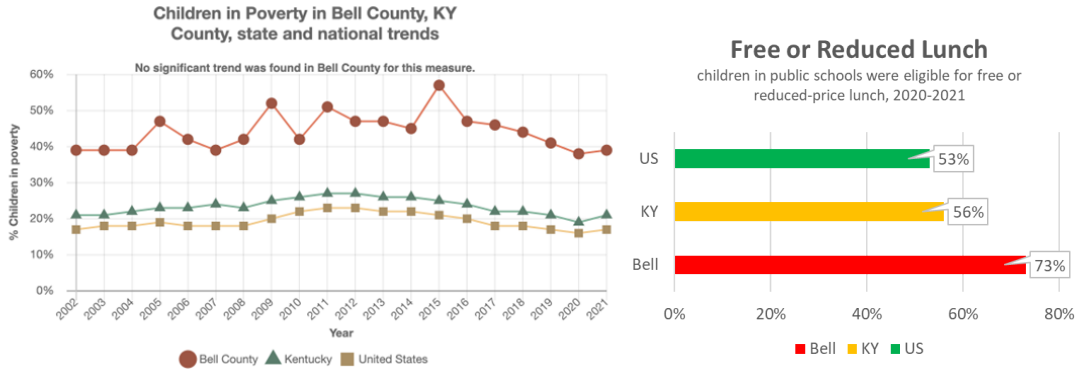

Median Household Income & Living Wage: The income where half of households in a county earn more and half of households earn less. In Bell County in 2021, the median household income was \$31,000. Half of all households had an annual income below this amount, and half had annual incomes above it. Data disaggregated by race shows Hispanics have the highest income at \$74,200, followed by Whites at \$32,800, and American Indian and Alaska Native at \$11,300.²⁴ Living wage is the hourly wage needed to cover basic household expenses plus all relevant taxes for a household of one adult and two children. In Bell County in 2022, workers would need an hourly wage of \$36.21 to cover basic household expenses for a household of one adult and two children.²⁵ Data disaggregated by subpopulation, including race and ethnicity, is not available for this measure.

Gender Pay Gap & Income Inequality: Ratio of women's median earnings to men's median earnings for all full-time, year-round workers, presented as "cents on the dollar." In Bell County from 2017-2021, women earned an average of \$0.85 for every \$1.00 men earned in annual income.²¹ Income inequality is the ratio of household income at the 80th percentile to income at the 20th percentile. In Bell County from 2017-2021, households with higher incomes had income 5.3 times that of households with lower incomes.²¹ Data disaggregated by subpopulation, including race and ethnicity, is not available for these measures.

Children in Poverty & Free or Reduced Lunch: Children in poverty represents the percentage of people under age 18 in poverty. In Bell County in 2021, 39% (2 out of 5) of children lived in poverty. Data disaggregated by race shows Hispanics have the highest rates at 38%, and Whites at 34%.²⁴ In Bell County for 2020-2021, 73% of children in public schools were eligible for free or reduced price lunch.²⁶ Data disaggregated by subpopulation, including race and ethnicity, is not available for this measure.

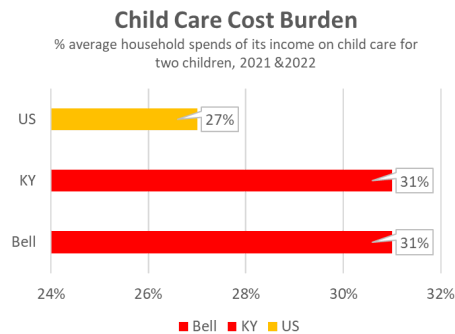

Family & Social Support

Children in Single-Parent Households: Children in Single-Parent Households represents the percentage of children that live in a household headed by a single parent. In Bell County, 27% of children lived in a household headed by a single parent on average from 2017-2021.²¹ Data disaggregated by subpopulation, including race and ethnicity, is not available for this measure.

Child Care Cost Burden: Child care costs for a household with two children as a percent of median household income. In Bell County in 2022, the average household spent 31% of its income on child care for two children. There were 6 child care centers per 1,000 children under age 5.^{24, 25} Data disaggregated by subpopulation, including race and ethnicity, is not available for these measures.

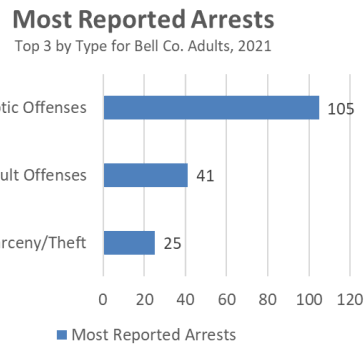

Community Safety

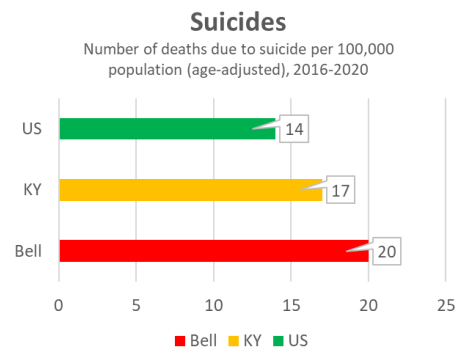

Firearm Fatalities: Firearm fatalities is the number of deaths due to firearms per 100,000 population. In Bell County, there were 17 firearm-related deaths per 100,000 people on average from 2016-2020.⁵

Motor Vehicle Crash Deaths & Most Reported Arrests: Motor vehicle crash deaths represents the number of motor vehicle crash deaths per 100,000 population. Traffic accidents involving motorcycles, 3-wheel motor vehicles, cars, vans, trucks, buses, street cars, ATVs, industrial, agricultural, & construction vehicles, and bicyclists or pedestrians when colliding with any of these vehicles. In Bell County, there were 24 deaths from motor vehicle crashes per 100,000 people on average from 2014-2020.⁵ Most reported arrests represent the total number of arrests reported by all law enforcement agencies in Bell County during 2021, drug/narcotic offenses was the number one reported arrest in 2021, at 105 offenses.²⁷ Data disaggregated by subpopulation, including race and ethnicity, is not available for these measures.

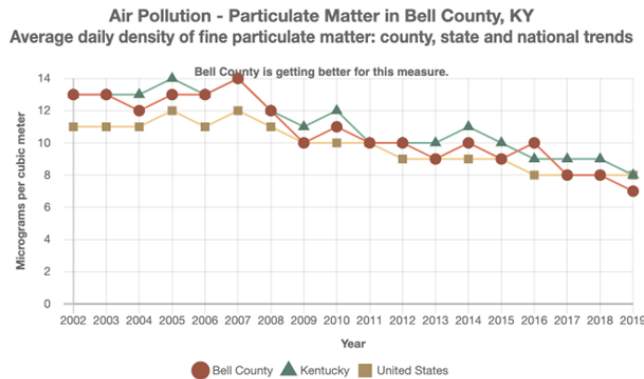

Suicides: Suicides represent the number of deaths due to self-inflicted injury per 100,000 population. Suicide is defined by ICD-10 codes X60-X84 (self-harm). Deaths are counted in the county of residence of the deceased. So, the death is counted in the home county of the individual who died. In Bell County, there were 20 deaths by suicide per 100,000 people, on average, from 2016-2020.⁵ Data disaggregated by subpopulation, including race and ethnicity, is not available for this measure.

Physical Environment

Air Pollution & Water Quality

Air Pollution - Particulate Matter & Water Quality Violations: Air pollution-particulate matter looks at average daily density of fine particulate matter in micrograms per cubic meter (PM2.5). In Bell County in 2019, an annual average of 7.3 micrograms per cubic meter of fine particulate matter was measured in the air. The Environmental Protection Agency (EPA) has primary annual average standards of 8.0 micrograms per cubic meter. For trending, this measure is getting better.²⁸ Water quality is measured by drinking water violations or the presence of health-related drinking water violations. At least 1 community water system in Bell County in 2021 reported a health-based drinking water violation.²⁹

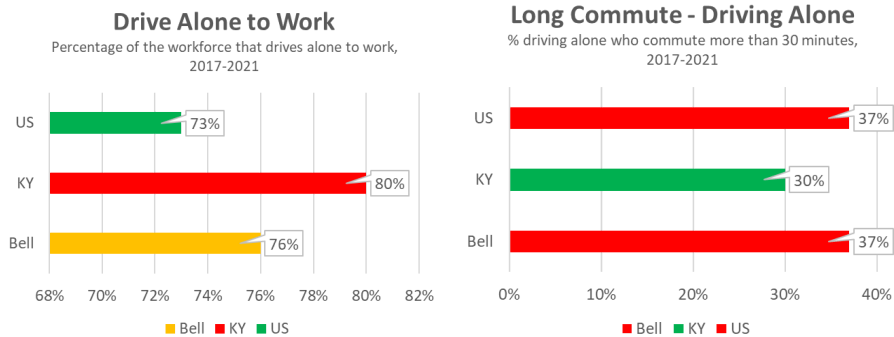

Housing

Homeownership, Severe Housing Problems, & Severe Housing Costs Burden: Homeownership is the Percentage of owner-occupied housing units. In Bell County, 63% of housing units were owner-occupied on average from 2017-2021.²¹ Severe housing problems represent the percentage of households with at least 1 of 4 housing problems: overcrowding, high housing costs, lack of kitchen facilities, or lack of plumbing facilities. In Bell County from 2015-2019, on average, 19% of households experienced at least one of the following housing problems: overcrowding, high housing costs, lack of kitchen facilities or lack of plumbing facilities.³⁰ Severe housing costs burden is the percentage of households that spend 50% or more of their household income on housing. In Bell County, 14% of households spent half or more of their income on housing on average from 2017-2021.²¹ The Bell County Homeless Count of students in preschool-grade 12 for Academic Year 2021-22 was at 380.³¹ Data disaggregated by subpopulation, including race and ethnicity, is not available for these measures.

Transit

Driving Alone to Work & Long Commute: Driving alone to work is the percentage of the workforce that drives alone to work. In Bell County, on average from 2017-2021, 76% of the workforce drives alone to work.²¹ Long commute is among workers who commute in their car alone, the percentage that commute more than 30 minutes. In Bell County, on average from 2017-2021, 37% of workers who drive alone to work commute more than 30 minutes each way.²¹ Data disaggregated by subpopulation, including race and ethnicity, is not available for these measures.

Internet Connection

Broadband Access: Broadband Access represents the percentage of households with broadband internet connection. In Bell County, on average from 2017-2021, 70% of households had a broadband internet connection.²¹ Data disaggregated by subpopulation, including race and ethnicity, is not available for these measures.

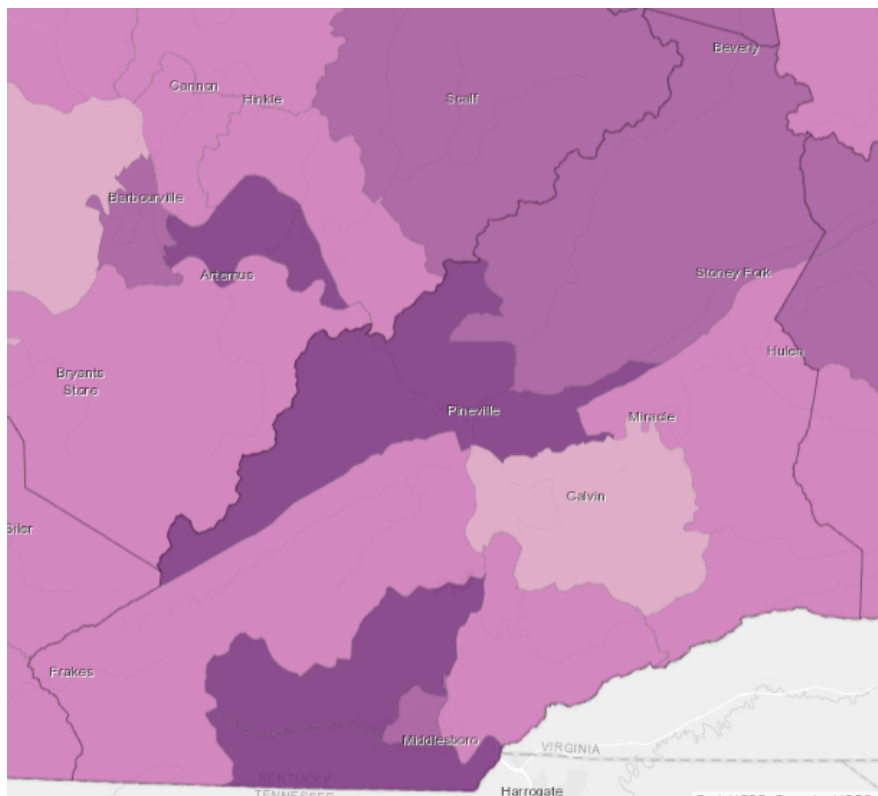

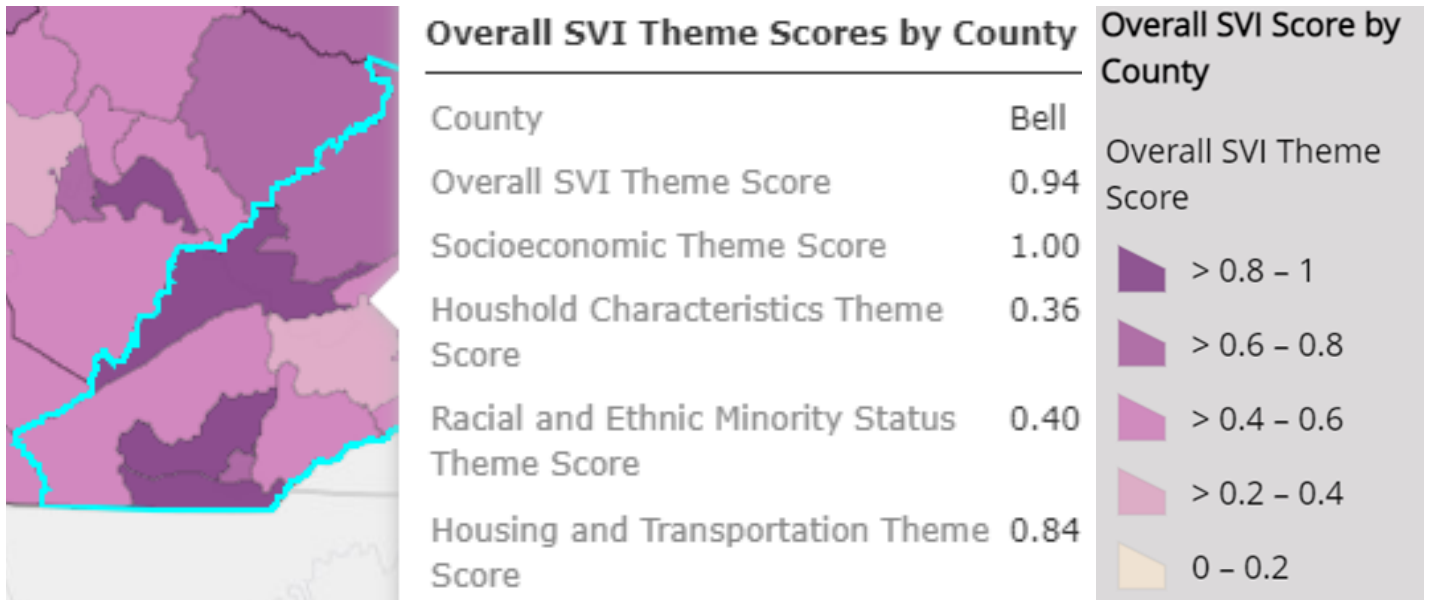

BCHD Programs & Services Addressing Community Safety & Physical Environment in Bell County

- *Food Safety Inspections*, including restaurant inspections, *Facility Inspection Programs*, *Community Sanitation and Safety Programs*, including private well water testing, public health nuisance complaints, vector and rodent control, and rabies prevention, and *Sewage Inspections*.
- *Tobacco Prevention and Control Program* works to eliminate non-smokers exposure to environmental tobacco smoke & e-cigarette aerosol.

Visit BCHD [website](#) for more information on these programs.

Social Vulnerability Index (SVI): Social vulnerability refers to the resilience of communities when confronted by external stresses on human health, such as natural or human-caused disasters or disease outbreaks. Reducing social vulnerability can decrease both human suffering and economic loss. The CDC's SVI uses Census data to determine the social vulnerability of every census tract. The SVI ranks each tract on 16 social factors and groups those factors into four related themes. These themes are: Socioeconomic Measures, Household Characteristics Measures, Racial and Ethnic Minority Status Measures, and Housing & Transportation Measures. The 2020 overall social vulnerability index theme score was 0.94 for Bell County, ranking it in the highest category for vulnerability.³²

Community Health Improvement Forum

During the community health improvement forum on November 8, 2023, a series of questions were posed to participants regarding their reactions to the data presentation (see **Appendix D**) plus community context concepts including social determinants of health, health equity, built environment, forces of change, and strengths, resources, and assets. Responses to these questions were captured in Jamboard, noted below.

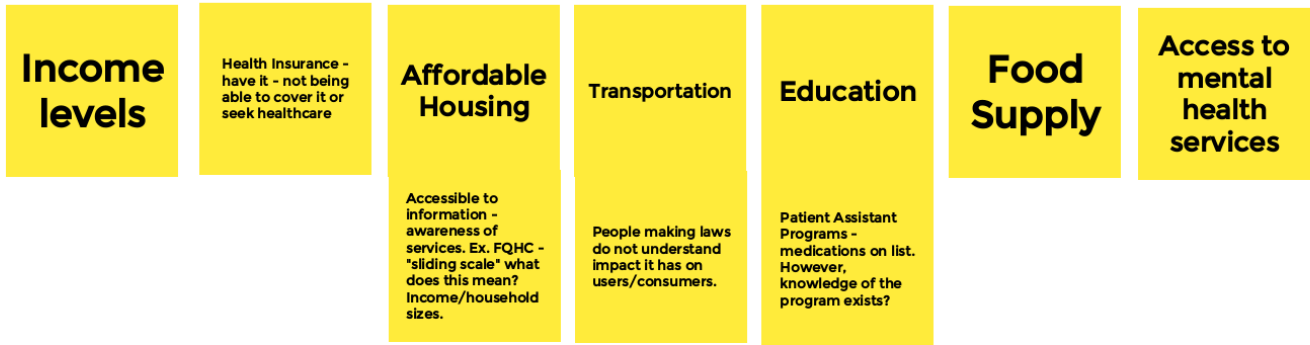

Bell County - Initial Reactions to Health Outcomes & Health Behaviors

| | | | |
|--|---|--|--|
| Access to care were lower than Ky and US. | Flu vaccination rates were lower after Covid-19. | Were not surprised about mental health and obesity rates | Collectively, would like to see all rates improve. |
| Are excessive drinking and alcohol-related deaths low before Middlesboro went wet in 2020? Would be good to monitor. | Was not surprising that teen birth rates were high. | Surprised that dental data was low. | Leading causes of death are not surprising. Heart disease death rates are definitely a cause of concern. |

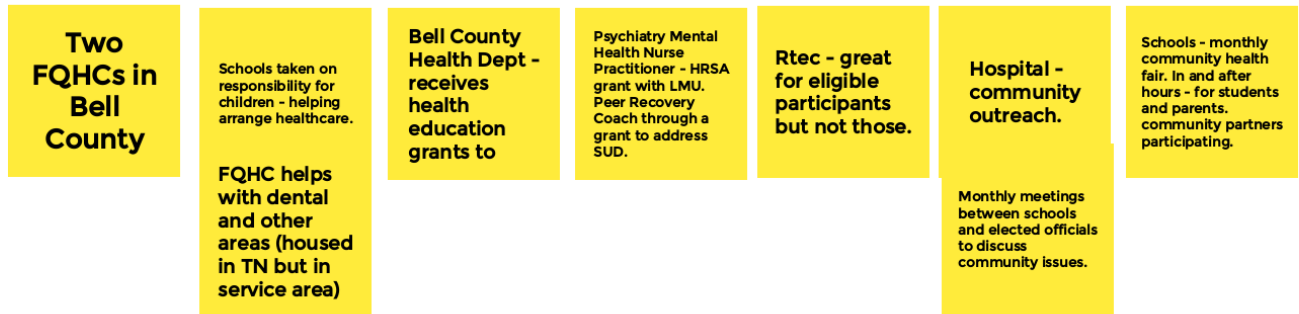

Bell County - Initial Reactions to Social & Economic Factors

| | | | | | |
|--|--|---|---|--|---|
| The willingness of survey takers to point out lack of livable wage and poor eating habits as risk factors. (In tune - understanding of the need) | Lack of livable wage - upscaling a career path for a more livable wage. Stuck in a minimum wage job - hard to advance. | Housing issues. Much higher rate than when survey was completed. Quality of housing - . Cost of housing - rent is \$700-800 month (impossible to pay) | High School Graduation Rate - High drop out rate. No consequences for those who drop out (laws do not address truency). | High Drop Out Rate - Laws/Government court system. Truancy to diversion program (importance of education - only consequence/solution) | Do not value education - which has a snowball effect. |
| Quit before you graduate mentality to get a check. | Upstream factors of policy impacting HS drop out rates. | If we could address minimum wage as upstream factor/policy that could help. | Do current legislators know about education laws/issues? | Living Wage - Seems High | LMU - Medical School/Vet School - increased rent because they know students/families will pay it. Very little housing available to Bell Co residents. |
| Smithfield (largest industry) turnover rate is 50%. | Government enforces - better off to be poor or rich. In the middle, most issues - no benefits. Paying taxes and barely getting by. | Number of households who spend 50% or more of income on housing. Families making low-income might make up big percent. | Because you are eligible for section 8 doesn't mean you can find quality housing or landlords who accept it. | | |

Social Determinants of Health & Upstream Factors Negatively Impacting Bell County Health?

What is Currently being done in Bell County to Address Health Equity?

What are the Built Environment's Physical & Cultural Assets and how do those vary by neighborhood in Bell County?

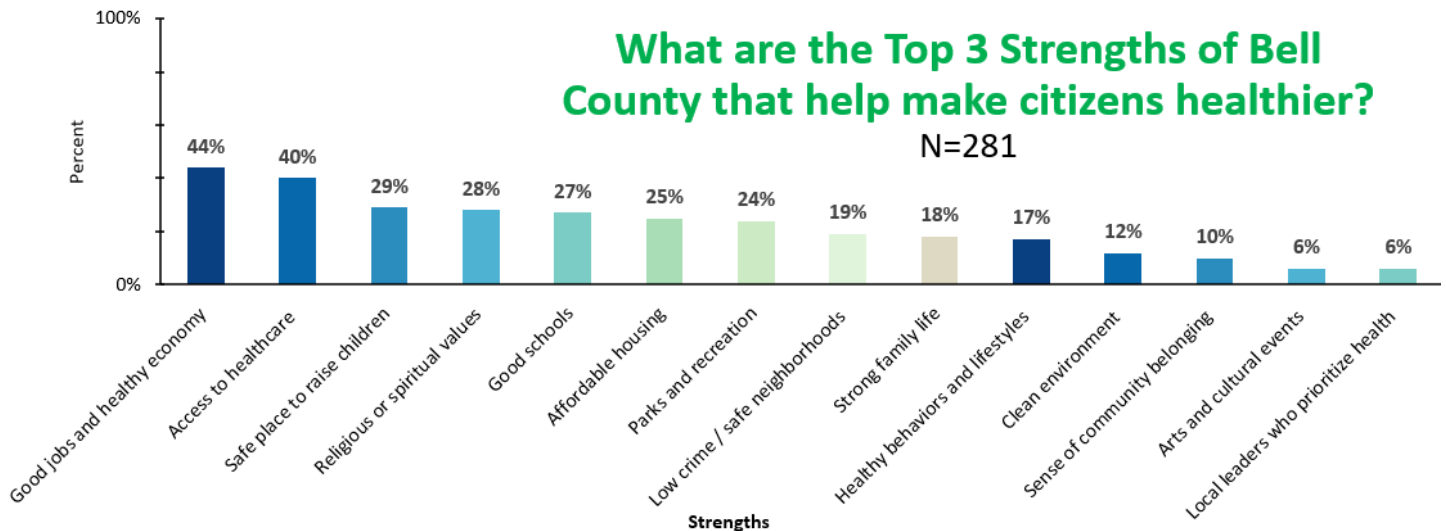

Current and Historical Forces of Change (positive or negative) at play in the local community, regionally and globally, that shape political, economic, and social conditions for community members?

| | | | | |
|---|---|--|---|---|
| Adam Bowling, state rep - wrote legislation for Recover Ready Communities. Will Bell County become one? | Restrictions - each school have immunizations delivered and high quality refrigeration. Funding is not working -VFC | High degree of regulations to serve our community/vulnerable populations. | DCBS - the state has changed the criteria and not making great progress in addressing abuse and neglect. Does not help schools. | Elected officials do not seem onboard. |
| The state cut off Health Dept services in schools. Eliminated. No shots were given. | Safe Haven Baby Box - raised over \$25,000. Placed at MRH. | Political Will - cannot approve harm reduction (SSP) in the county. People with SUD ave to go to Knox County. "Not an issue here - we don't want that in our town" | | |

What Strengths, Resources, and Assets does Bell County have that support health and well-being?

| | | | | | |
|--|--|--|--|--|---|
| National Park & State Park | Offer both public and private schools. Variety of schools | Rural area - very walkable communities. | Weather - not in tornado alley. Not bad or great just mediocre. | Hospitality - people are very nice in the community. | Low crime throughout county |
| Never felt unsafe or thought kids were unsafe. | Adequate healthcare. Maybe not mental health care but 2 FQHCs, health dept, private clinics. | Abundance of local business - a lot of mom-and-pop stores. Help with Mainstreet. Increase in local business. Caring community. | A handful of cities that have a cracker barrel not on interstate. :) | Shade Steakhouse voted best steakhouse in Kentucky. | Hiking and outdoor opportunities - there if we want it. |

Bell County 2023 Community Health Status Assessment

The following infographic captures Bell County highlights of the 2023 Community Health Status Assessment.

2023 BELL COUNTY COMMUNITY STATUS ASSESSMENT

BELL COUNTY

Published December 2023

In September 2023, Bell County community partners and members initiated a community health assessment and improvement planning process. This process involved:

- assessing health data from various sources
- conducting a community survey
- hosting a community health improvement forum for community members

In 2023, Bell County Ranked 112 out of 120 in Health Outcomes for Kentucky's County Health Rankings

Sources: University of Wisconsin Population Health Institute, County Health Rankings & Roadmaps 2023

Appendix A: CHI Partnerships

Special thanks to the agencies and individuals representing various sectors listed below that contributed to the successful assessments and completion of this report that were critical to the success, breadth, and diversity of data collection. Partners were instrumental in survey distribution and community forum recruitment through their networking circles. Several partners listed also represent populations who are disproportionately affected by conditions that create poorer health outcomes or for whom systems of care are not appropriately designed. This representation is critical to undergoing a successful CHI process.

Appendix B: CHI Process

Community Health Improvement Process

Facilitated by Eastern Kentucky University

Department of Public Health and Clinical Sciences

Created: 2023

OVERVIEW

Community Health Improvement

Eastern Kentucky University's (EKU) Department of Public Health and Clinical Sciences (DPHCS) within the College of Health Sciences is excited to partner with local health departments (LHDs) on their journey toward community health improvement (CHI). The EKU DPHCS CHI process includes facilitating a community health assessment (CHA) to identify priority health issues. Then, the LHD will collaborate with its partners to develop a feasible and sustainable community health improvement plan (CHIP) to address these priority health issues. EKU DPHCS will be available to assist with the CHIP development, but it is intended to be a community-led plan. Therefore, the LHD and its partners will share most of CHIP development and implementation.

Community Engagement Process

EKU DPHCS addresses CHI meaningfully, effectively, and efficiently by implementing the National Association of City and County Officials (NACCHO) version 2.0 Mobilizing for Action Through Planning and Partnerships (MAPP) community engagement process. EKU DPHCS partners with the Kentucky Department for Public Health, Kentucky Public Health Association, Kentucky Health Departments Association, and the Academy of Science Kentucky Group to implement existing resources geared toward CHI.

What to Expect

During the six-month* CHI process, EKU DPHCS staff will work with the LHD to identify their CHI needs, then develop a plan of action most appropriate to meet these needs. Local public health system partners and community members will be engaged through a community status assessment, a community partner assessment, and a community context assessment. Each LHD should expect to participate in virtual or in-person meetings and community forums over six months.

CHI Requirements

EKU DPHCS staff is familiar with the Kentucky public health transformation CHI requirements and the public health accreditation board (PHAB) standards and measures. While not a focal point, these requirements are advertently addressed in EKU DPHCS's facilitated CHI process.

Final Thoughts

CHI is only successful if the community takes ownership and accountability in addressing its health needs. Therefore, EKU DPHCS staff will stress the importance of the LHD having a board of health support and understanding that it will be responsible for ensuring the progress of CHI after EKU DPHCS's portion is complete. EKU will always be available to answer questions or provide feedback, but it will be up to the LHD to sustain the CHI process.

*Note: *EKU's facilitated CHI process is estimated to take 6 months, but this timeframe may be adjusted based on the LHD's CHI needs. The LHD will be responsible for continuing the CHI process by developing a CHIP and routine data collection to identify health trends.*

Community Health Improvement BCHD Community Engagement Process

1. **Initial Discussion (email communication on 08/07/23 & Zoom on 08/16/23 & between EKU and BCHD)**
 - Answer BCHD's initial questions regarding CHA/CHIP process
 - Discuss previous CHA/CHIP Cycles
 - Participation (e.g., hospital-led) or Lead (e.g., BCHD-led)
 - Existing partnerships/coalitions
 - Discussion concerning the steering committee
 - Is Vision already established? (Revisit during CHA Partnership Kick-Off Meeting – Poll Question)
2. **EKU/BCHD Only Virtual Kick-Off Meeting (1 hour via Zoom on August 22, 2023)**
 - Community Engagement Process (Modified MAPP 2.0)
 - Project Timelines
 - Roles & Expectations
 - Prepare for the partnership kick-off meeting
3. **CHA Partnership Virtual Kick-Off Meeting (1 hour via Zoom on September 19, 2023)**
 - Facilitated by EKU
 - Partners invited by BCHD
 - EKU provides a CHI stakeholder list and partner invitation letter
 - EKU presents:
 - Overview of the CHA process
 - Brief overview of the community engagement process
 - Timelines
 - Partner Expectations
 - Sharing of available data, resources, and assets
 - Promotion of community survey to customers
 - Attendance at a community forum for feedback and input
 - Opportunity to collect Resources/Assets via an online tool (e.g., Jamboard)
 - EKU Responsibilities
 - In the process of collecting secondary data:
 - Demographics
 - Health Factors & Outcomes
 - Recent Hospital CHNA results
 - Scanning for health disparities
 - Ask for volunteers to review measures/data
4. **Community Status Assessment – Modified Mapp 2.0 (launched September 19, 2023 & closed on October 30, 2023)**
 - Recommended: KY Group – Academy of Science: Alchemer CHA Template
 - Survey can be tweaked to BCHD's needs
 - Promotion of survey by all partners (electronic and paper)
 - Translated copy per BCHD jurisdiction needs.
 - Survey Availability Set
 - Minimum 1-month
 - Target number identified by partners & reflection of community demographics
 - Survey Results Analyzed by EKU Staff
 - Incorporate survey results with relevant health factors, outcomes piece in CHA

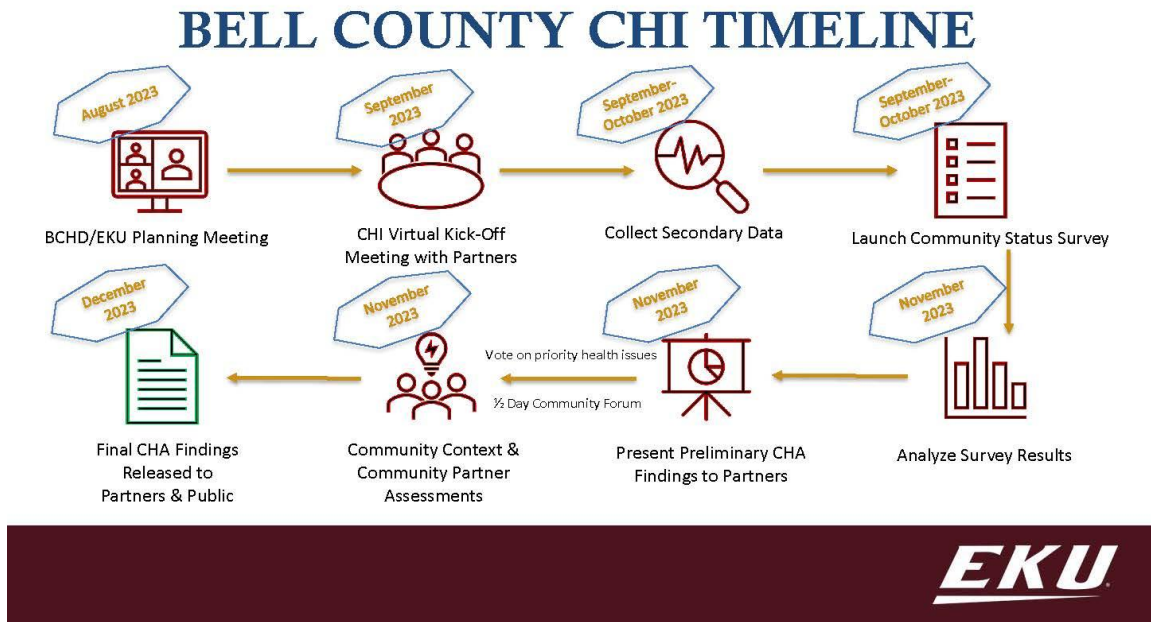

5. ½ Day In-Person Community Forum (November 8, 2023)

- Facilitated by EKU
- BCHD secures the venues and invites community partners and members
- If available, send a draft of the CHA data presentation for review before the community forum
- Welcome and Introduction of CHI Process – Purpose of Community Forum
- Health Outcomes, Health Behaviors, and Clinical Care Secondary Data Presentation with Community Status Assessment findings included where appropriate (EKU)
 - Collect participants' reactions to the data (EKU)
 - Preliminary Prioritization of Priority Health Issues (*unless the local hospital has recently conducted a CHNA, in which BCHD/partners may choose to select those*)
- Social and Economic Factors plus Physical Environment Secondary Data Presentation with Community Status Assessment findings included where appropriate (EKU)
 - Collect participants' reactions to the data (EKU)
- **Community Context Assessment – Modified MAPP 2.0 (EKU facilitates discussions)**
 - Community Strengths and Assets
 - What strengths and resources does your community have that support health and well-being?
 - Built Environment
 - What are the physical and cultural assets in the built environment, and how do those vary by neighborhood?
 - Forces of Change
 - What are the current and historical forces of change at play in the local community, regionally and globally, shaping political, economic, and social conditions for community members?
 - What steps are being taken in the community to improve health outcomes? What solutions have the community already identified on its own to improve community health?
- **Community Partner Assessment – Modified MAPP 2.0 (EKU facilitates discussions)**
 - Health Equity
 - Perceived Social Determinants of Health & Upstream Factors?
 - Currently doing to address health equity?
 - Final Prioritization of Priority Health Issues (*unless the local hospital has recently conducted a CHNA, in which BCHD/partners may choose to select those*)

6. Post ½ Day In-Person Community Forum (after November 8, 2023)

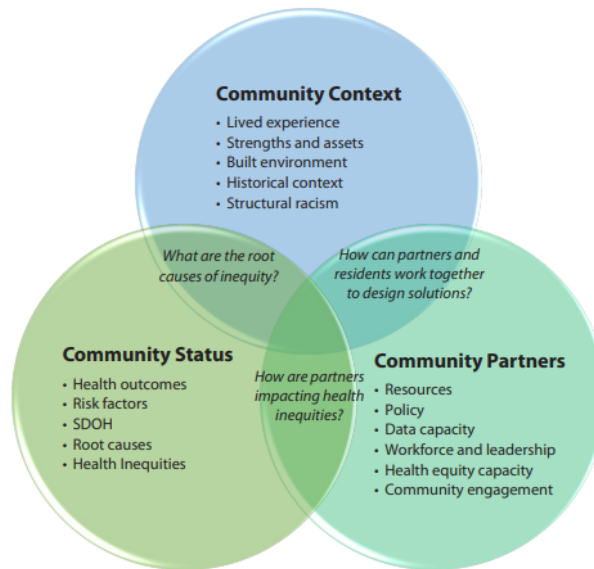

- Input from the forum typed up and incorporated into the final CHA
- Final CHA document and 2-page summary infographic available to partners and public by December 31, 2023
- Community Health Improvement Plan – CHIP (setting the stage)
 - BCHD to consider skills & capacities the organization can bring to priority health issues
 - Partners commit to CHI (pledge, form, or sign-ups)
 - Schedule the next meeting date to work on CHIP goals, objectives, & activities
 - Partnership might consider focus groups or community survey(s) tailored to a better understanding of priority health issues

Bell County CHI Process Timeline (August 2023-December 2023)

MAPP 2.0 Modified Assessments

EKU DPHCS incorporates components of the National Association for County and City Health Officials' (NACCHO's) Mobilizing for Action through Planning and Partnerships (MAPP) framework. MAPP is a community-driven strategic planning process for improving community health. The MAPP 2.0 process includes an assessment phase of telling the community story by conducting the following assessments: Community Status Assessment, Community Partners Assessment, and Community Context Assessment. Through ECU DPHCS CHI Process, each assessment's components are touched on strategically. See the figure below for more information on what these assessments address.

Community Forum Participation

- The purpose of this forum is to review preliminary community health assessment findings and hear your insight into our community's health status. With this information, community partners will identify the top concerns for our community and use your ideas and knowledge to finalize the community health assessment, which we plan to publicly share with the community by ***December 31, 2023***.
- Notes will be taken by a researcher from Eastern Kentucky University throughout the course of the forum and will be shredded or password-protected following the completion of the study. At no time will your name appear on any official document associated with this forum. All responses will be confidential. By participating in this forum, you will be giving your informed consent. Your participation is voluntary. You may choose to stop at any time.

Bell County Community Health Improvement

Community Forum Bell County Perspective

Wednesday, November 8, 2023
Pine Mountain State Resort Park
11:30 AM-3:30 PM

Sponsored by Bell County Health Department
Facilitated by Eastern Kentucky University Department of Public Health and Clinical Sciences

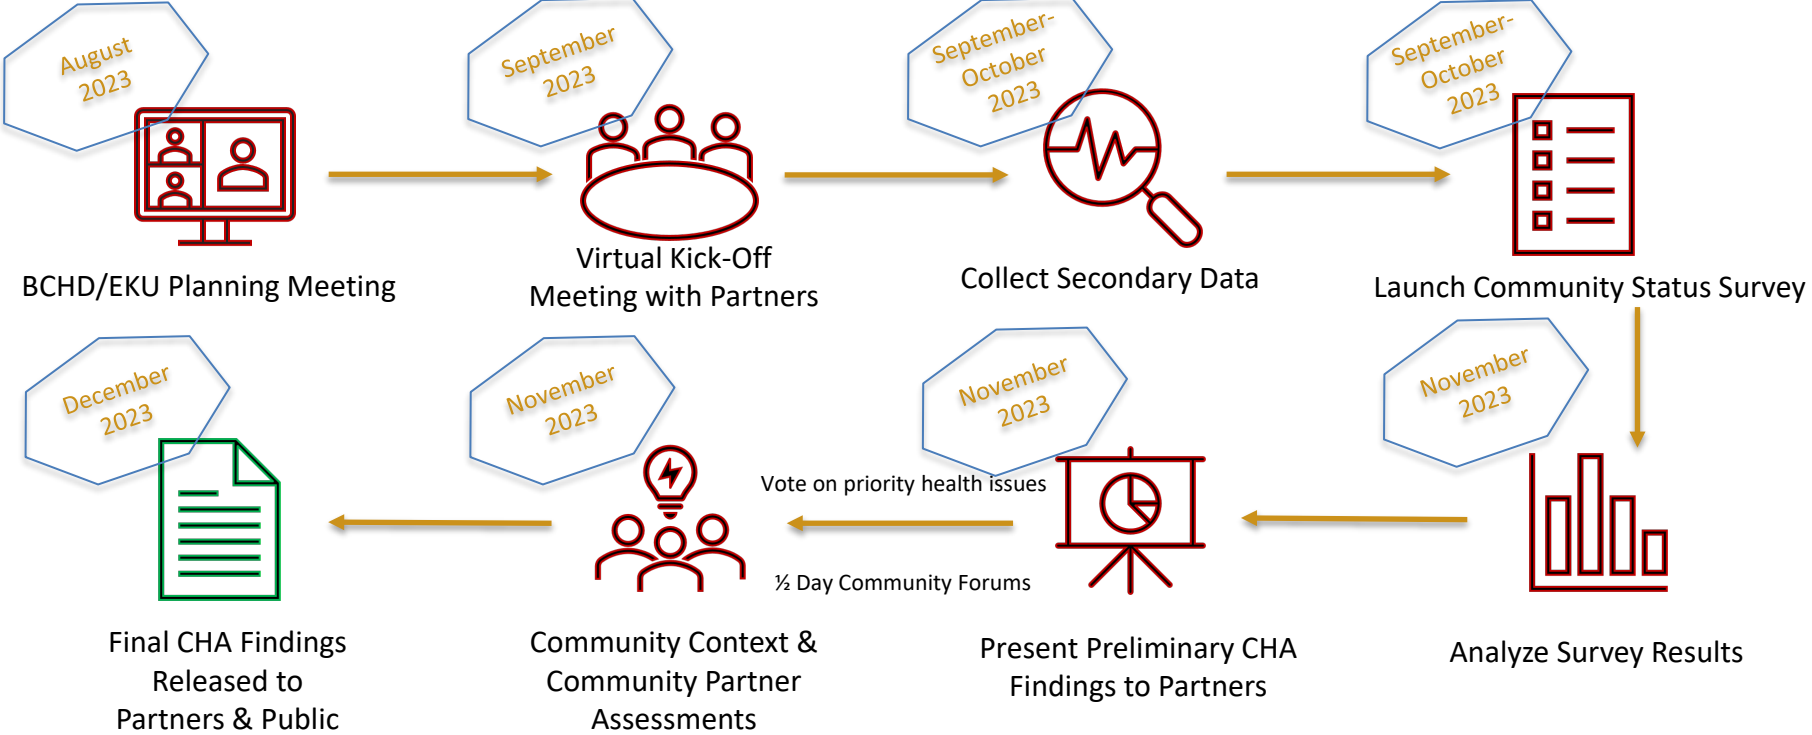

Welcome!

Taneisha Brummett
Public Health Director
Bell County Health Department

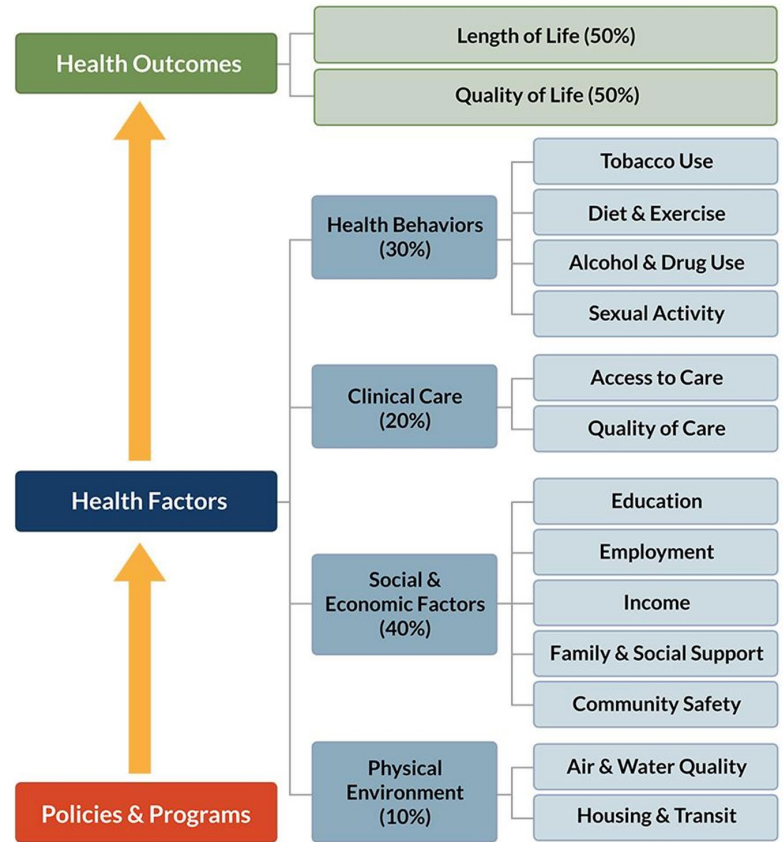

BELL COUNTY CHI TIMELINE

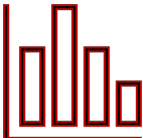

Today's Community Forum Purpose

- ✓ Gain a better understanding of the community's perspective on the health status of Bell County
- ✓ Strategic examination of the Health Outcomes & Health Factors influencing the health status of Bell County
- ✓ Interpret the results of the Community Status Assessment survey results
- ✓ Brainstorm policies & and programs addressing or need to address, social and economic factors as well as its physical environment

County Health Rankings model © 2016 UWPHI

2023 Community Status Assessment

- Assessment available from September 19, 2023, to October 30, 2023
- 38-question survey instrument A red-outlined square icon containing four small squares on the left and four horizontal lines on the right, representing a survey instrument.
- Promoted via partner listservs, social media, & websites
- 281 Completed Surveys for Bell County A red-outlined bar chart icon with four vertical bars of varying heights, representing data analysis or survey results.

 - Analyzed results shared throughout today's presentation!

COMMUNITY CONTEXT DISCUSSION

2023 Community Status Assessment Results

In the past 12 months...
(Select all that apply)

N=281

2023 Community Status Assessment Results

Community Context – Health Equity

Think about your personal and professional experiences...

what are the perceived social determinants of health & upstream factors that most negatively impact the community's health status?

Community Context – Health Equity

What is the community currently doing to address health equity?

In other words, what are we doing to ensure just and fair opportunities for all individuals/populations in the community?

Tip: Think about bridging the gap between social factors and economic factors, especially those that negatively impact vulnerable populations

Community Context – Forces of Change

What are the current and historical forces of change (positive or negative) at play in the local community, regionally and globally, that shape **political, economic, & social conditions** for community members?

Let's take a tiered approach to local → regional → global

– **Political environment** (*i.e., policy implementation*)

- Policies that impact your community's health!

– **Economic** (*i.e., employment and income*)

- Consider the income factors: unemployment, median pay, income gap, living wage

– **Social** (*i.e., social determinants that influence health*)

- Consider demographics, education, family & social support, community safety, housing, & transit factors

10-MINUTE BRAIN BREAK

What is the Built Environment?

- The built environment includes the **physical makeup** of where we live, learn, work, and play—our homes, schools, businesses, streets and sidewalks, open spaces, and transportation options.
- The built environment can influence overall community health and individual behaviors such as physical activity and healthy eating.

Community Context – Built Environment

What are the built environment's physical and cultural assets, and how do those vary by neighborhood?

Let's break this sentence up into two groups:

1. Physical assets by neighborhood (e.g., parts of the county)
2. Cultural assets by neighborhood (e.g., parts of the county)

Try to be as specific as possible

Community Partner – What are Our Strengths?

What strengths and resources does your community have that support health and well-being?

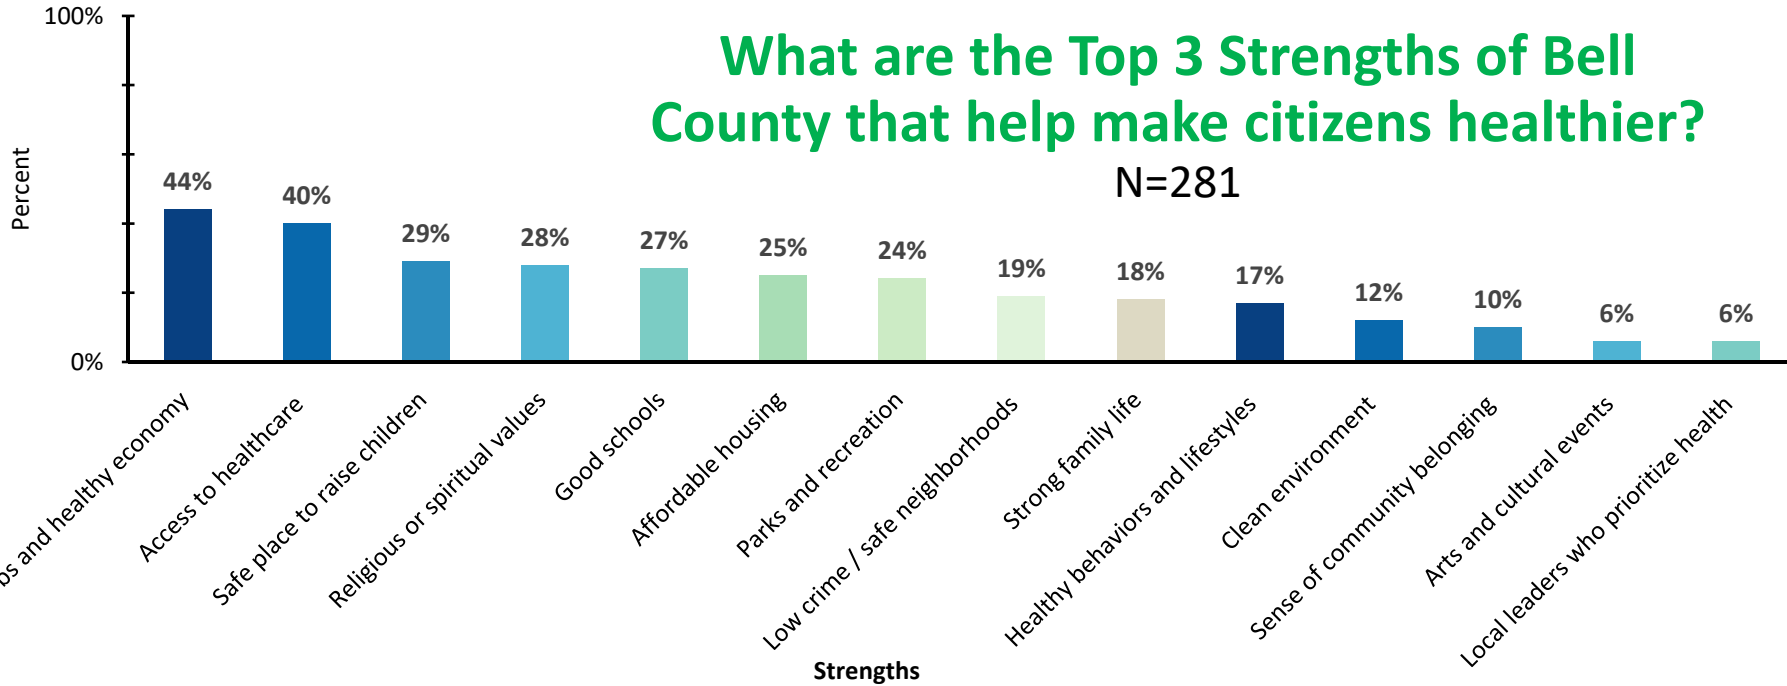

Tip: If someone looking to relocate their family in Bell County came up to you and asked you this question, what would be your response?

Voice your thoughts! No wrong ideas 😊

Priority Health Areas Sign-Ups

- Please sign up to join one of today's selected priority health area workgroups.
- Be on the lookout for an email from BCHD staff on the next meeting times to address community health improvement goals, objectives, and strategies!

Visioning Re-Draft

A healthy and safe Bell County is a community with accessible substance abuse treatment and harm reduction, including syringe exchange. We prioritize mental health, combat loneliness among the elderly, reduce homelessness, and offer resources for smoking cessation and nutritional education. Physical activity options promote well-being, creating a united and thriving environment for all.

Next Steps

- Reflect on today's data presentation
 - Email taneisha.brummett@ky.gov if additional comments come to mind!
- Consider which priority health topic you or your agency will be of the greatest asset.
- Full community health assessment results will be publicly available by December 31, 2023!
